IR - Table 1 - Result Indicators - Qualitative and Total values

The records in Table 1 are automatically created from Table 3 of the linked programme at creation time (from Table 10 for TA Priority Axes/Specific Objectives). If the authorities have defined the indicator as a qualitative indicator in the programme the achievement values are also qualitative.

When the indicator is a qualitative indicator you need to provide a value for **"2019 qualitative"** and **"2018 qualitative"** in Table 1 of the AIR. The total fields will not be editable.

For a quantitative indicator you need to provide a value for **"Total 2019"** and **"Total 2018"**. The qualitative fields will not be editable.
