Search Documents - 'Text Search' field - How should I look for a document using the 'Text Search' field?

When you are looking for a document under the **'Search documents'** section, you can use the field **'Text Search'**. This field follows the ORACLE TEXT specification: https://docs.oracle.com/database/121/CCREF/cqoper.htm#CCREF0300

The reserved words should be avoided because if you use one of these words you will get an error and no documents will be found.

Reserved words:
'about','accum','and','bt','btg','bti','btp','equiv','fuzzy','haspath','inpath','mdata','minus','near',
