OP - S2 Indicators - How to change an Indicator's name or ID

In version 1+ of a Programme, it isn't possible to change the ID or name of an Indicator.

If you wish to make a change to an Indicator's ID or name you will have to:

1. create a new Indicator
2. delete the old Indicator records from the Indicator tables (3, 4, 5, 6)

If the Indicator isn't used anywhere else (in another table or a previous version of the Programme), then the Indicator's definition will also be deleted and the Indicator will no longer appear in the drop-down list.

After this is done, you can recreate the same Indicator code with a new description.
