TOD IJG - Table 1 - Data for columns 8 & 9

Clarifications on the data that should be entered for columns 8 and 9:

Colum 8 “Total eligible cost of selected operations (EUR)” is “EU contribution + national”, while “national” can be “public + private” or only “public”.

> It is to be understood as the amount of the total eligible cost of the operation approved in the document setting out the conditions for support (referred to in the Annex XVII CPR – **Field 56**).
>
> Depending on the payment calculation method for given programme priority and an operation, it may include also private financing.
>
> When the payment calculation method for given priority is based only on public contribution, see Art. 22(3)(g) and 112(2) CPR, then it is expected that Field 56 = Field 57, therefore only “EU contribution + national public”. Then Column 8 in table 1 should include only “EU + national public cost”.
>
> If Field 56 and the cost of selected operations (Column 8) would include also eligible private costs, although based on the programme, the payment calculation method for given priority is public and the total financial allocation (Column 6) is public, it would be comparing pears with apples in data transmitted %.

Column 9 “Contribution from the funds to selected operations (EUR”) means **only EU contribution**
