

[OP - S2 Table 6 - Performance Framework: Adding an Indicator / Missing Indicators](#)

On table 6 if the indicator drop-down list is empty you can create a new indicator and specify the type (Financial, Implementation, etc), and this can then be selected from the list:

The screenshot shows the 'Edit Details' form for adding a new indicator. The form is divided into two main sections: a left sidebar with a navigation tree and a main content area. The sidebar includes the European Commission logo and a search bar. The navigation tree shows a hierarchy from S1 Strategy down to S2 Priority axes, with 'Table6 Performance framev' highlighted in a red box. The main content area is titled 'Edit Details' and contains several radio buttons for indicator types: 'Implementation Step', 'Financial indicator', 'Output indicator (common or programme specific)', and 'Result indicator (common or programme specific)'. Below these is a 'New indicator' section, which is highlighted with a red border. This section includes a dropdown menu for 'Indicator' with options: 'Financial', 'Implementation Step', 'Output', and 'Result'. Other fields in the 'New indicator' section include 'Measurement unit for indicator', 'Has qualitative target' (checkbox), 'Order' (text input), 'Fund' (dropdown), 'Category of region' (dropdown), and several milestone and target fields: 'Milestone total for 2018', 'Milestone men for 2018', 'Milestone women for 2018', 'Qualitative Target', and 'Final total target (2023)'.
