General - In the 'free text' fields the numbering of paragraphs restarts after each "style" change, how do I correct this?

If you want to have a list like this in the free text editor:

1. aaaa
2. bbb
3. ccc
    - ccc.111
    - ccc.222
4. ddd
5. eee
6. fff

You have to follow these steps:

First start with the list without formatting:

aaaa

aaaa.1111

bbbb

Then you mark and number all of them (false) :

1. aaaa
2. aaaa.1111

3. bbbb

Then you indent the one(s) in the middle (false) :

1. aaaa
    1. aaaa.1111
2. bbbb

Then you change numbering to bullets (false) :

1. aaaa
    - aaaa.1111
2. bbbb

The alternative is to edit first in a Word document and copy/paste from there.
