OP - Validation rule 2.36 - What if a specific objective is not required for TA in a Cooperation programme but validation error 2.36 is raised?

According to the regulation (Impl Reg 288-2014) if Union Support to technical assistance in the Cooperation Programme does not exceed **EUR 15 Million**, a Specific Objective is not required but upon validation the following error will arise:

'At least one specific objective must be defined for each TA priority axis. Priority axis "n".'

In this case please do the following:

- **create a Specific Objective called "Technical Assistance"**
- **in the Result field enter "Not applicable because TA does not exceed EUR 15 Million"**
