OP - S3 Financing Plan - YEI in Table 17, 18a and 18b - What information should I enter in OP - S3 Financing Plan for YEI in tables 17, 18a and 18b?

• **Table 17**: in the table the resources from the specific allocation for YEI (row 9) should be presented separately from the corresponding ESF support. The corresponding ESF support should be presented as part of the overall ESF resources per category of regions (rows 5-8). The columns for the performance reserve in this table should not include the matching ESF support for the YEI, as this is excluded from the performance reserve.
• **Table 18a**: in this table the YEI specific allocation and the corresponding ESF resources for each (part of) priority axis should be presented together as a sum. At the bottom of the table in the total ESF funds for each category of region cells the ESF corresponding resources should not be taken into account, but should be included in the sum of the total YEI funds.
• **Table 18b**: this table should be completed for every (part of) a priority axis implementing the YEI and should be used to determine the co-financing rates, the total allocation between the specific allocation for the YEI and the corresponding ESF support, and the ratio between the categories of regions for the corresponding ESF support.
