

Event Registration - Event Type - If a new Event Type is created within an Event Type Group I'm subscribed to, will the system automatically subscribe me to that new Event Type?

When you register to receive notifications for an Event Type Group the system will automatically select all Event Types but you will have to **update your registration manually in SFC2014** each time a new Event Type has been created in the system.

The screenshot displays the 'SHARED FUND MANAGEMENT COMMON SYSTEM' interface for the 'Period 2014-2020 (SFC2014)'. The breadcrumb trail indicates the user is in 'Event registration' under 'Utilities'. The left sidebar shows a tree view for 'Event notifications' for user 'sfc2014.user@hotmail.com', with 'Event type groups' selected. The main content area is titled 'EVENT NOTIFICATIONS' and shows a 'Subscription' section with the instruction 'Select event type groups'. Below this is a table of event type groups.

EVENT TYPE GROUP	
<input checked="" type="checkbox"/>	Audit
<input type="checkbox"/>	Document registration
<input type="checkbox"/>	Execution and closure
<input type="checkbox"/>	Monitoring and evaluation
<input type="checkbox"/>	Programming and applications
<input type="checkbox"/>	Strategic planning
