

Event Registration - Notifications - I have registered to receive Event notifications but I don't receive notification emails, why?

Please check your registration in SFC2014!

If the email address is displayed in red in the Event Registration menu it means that the registration (changes) still needs to be activated. As long as the registration is not activated, the registration or the changes you have made to your current registration are not applied and you will not receive the email notifications as registered for.

The screenshot displays the 'SHARED FUND MANAGEMENT COMMON SYSTEM' interface for the 'Period 2014-2020 (SFC2014)'. The breadcrumb trail indicates the user is in 'Event registration' under 'SFC2014-FO' > 'Utilities'. A navigation bar lists various system functions. On the left, the 'Event notifications' menu item is expanded, showing a list of registered email addresses. The address 'sfc2014.notification@hotmail.com' is highlighted in red, indicating it is not yet activated. An orange arrow points to this red text. Below the list, there are options to 'Subscribe for' and 'Filter by CCI'. The main content area, titled 'EVENT NOTIFICATIONS', shows the same email address in a table under the 'EMAIL' header. A note at the bottom explains that the first subscription must be for event type 'in red' and that users should only subscribe themselves.
