General - Why does SFC2014 ask me to electronically sign when I send an object?

The **Sending** of information by a Member State to the Commission should be **electronically signed in accordance with Directive 1999/93/EC**.

Sending of the different objects is generating a snapshot document and after the sending an acknowledge
document is generated by the European Commission.

This acknowledge document is signed but the Member State was not signing the snapshot document. The EU Login now provides a functionality of signing without forcing the user to have a certificate. The action to sign will only be triggered when sending to the European Commission:

(1) Enter your SFC2014 Password

(2) Click on the 'Sign' button

The Signature is performed by the ECAS server cryptographic private key and the Programme is sent to the Commission.
