RDP - Amendment - Can I create one new version of the RDP for different amendment types?

One RDP amendment can cover several amendment types. In such a case, in section *General > Amendment > 1. Type of amendment R.1305/2013*, the good practice is to check the box related to the higher paragraph of article 11 that applies to the RDP.

However, it is not possible to have more than one open RDP amendment in SFC2014.
