NAR - Creation - Why can I no longer create a National Audit Report (obsolete)?

As from release version 2.10.7 (29/08/2017) onwards it is not possible anymore to create a NAR referring document under the old menu **Audit > National audit report (obsolete)**, but the referring document **"EC comments on national audit report"** can still be created and sent by European Commission Users.

The document **"MS reply to EC comments on national audit report"** remains possible as well but only for the audit reports originally uploaded by the Member State under this module.

The menu **National audit report (obsolete)** contains the National audit report documents submitted before the structured National audit report was implemented in SFC2014.

The new menu **National audit report IGJ/ETC, EMFF, FEAD & IPA-CBC** contains the structured National audit report.

No data will be migrated to the (structured) National Audit report menu.
