

ACO - Documents - Which role do I need to be able to read the 'Audit Communication' documents?

'Audit Communications' can be used for sending information to DG AGRI - Dir H in a secure way. Uploading and sending data/documents can only be performed by users having the role 'Coordination Body Update & Send' (MSCB).

As the 'Audit Communication' documents can contain some personal data, they are encrypted by SFC2014. In order to read them in SFC after upload, the role '**MS Audit Personal Data Read**' (MSAPDR) will be also requested.

Thus, in addition to the MSCB, the MSAPDR will be necessary.
