

IR - Table 6 - Why some fields in the Table 6 column “Total eligible expenditure incurred by beneficiaries and paid by 31/12/2018 and certified to the Commission” are empty?

Table 6 is not editable and it is shown as they exist in Table 1 of the Financial Data submission of 31/01/Reporting Year+1.

The column “Total eligible expenditure incurred by beneficiaries and paid by 31/12/2018 and certified to the Commission” is only displayed in AIR2018. Its value comes from the “2018 CUM TOTAL” value of the Financial Indicators for each Priority Axis, Fund and Category of Region in Table 5.

The Performance Framework is defined in the programme on **non-Technical Assistance priority axes only**, it does not contain TA priority axes. Therefore, in the AIR, the fields for Priority axes for technical assistance (TA) will show no value.
