

PA - Calculation Report - Why I don't find the calculation report document in my payment application in status 'Accepted by EC'?

The Commission doesn't send any Calculation Report in the specific cases that the amount to pay is zero (0€). The reason of not providing a calculation report for the “0” amount payment claims is that actually no new expenditure is declared to the Commission, so there is nothing to calculate. The cumulative figures remain the same as in the last calculation report which the Commission sent to the Member State through SFC2014.
