RDP - 5.2 Measures - Adding measures under Priority 1 and Priority 4

It's not possible to add measures under Priority 1 (P1) and Priority 4 (P4) in section 5.2 of the Programme.

The selection of these measures is done at the level of the Priority and not at the level of the Focus Area.

Measures are selected by Focus Area except:

- **For Priority 1**, which is a Cross-Cutting Priority, the measures (M01; M02; M16) are automatically selected from the other Priorities.
- **For Priority 4**, there is a distinction between *Measures for agricultural land* and *Measures for forestry land*. Also, the selection of these measures is done at the level of the Priority and not at the level of the Focus Area (select P4: Restoring, preserving and enhancing ecosystems related to agriculture and forestry in the left panel).
