OP - S2 Indicators - How do I add COVID19 specific indicators?

If you need to add Covid-specific indicators there is a set of pre-defined indicators/codes that you can use.

The new COVID indicators are not in the drop down list for common result/output indicators – you must enter them manually as a new programme specific indicator and when you click on 'update' the system then checks if it’s a ‘reserved’ code for COVID. Once defined it can be reused like the other already defined specific indicators.

You will receive an error message if you are trying to use a Covid-specific indicator that is not defined for the chosen fund.
The following Covid-specific indicator IDs are reserved for future use and shouldn't be used :

CODE	DESCRIPTION	MEASUREMENT_UNIT
CV16	RESERVED - code not available	Reserved
CV17	RESERVED - code not available	Reserved
CV18	RESERVED - code not available	Reserved
CV19	RESERVED - code not available	Reserved
CV36	RESERVED - code not available	Reserved
CV37	RESERVED - code not available	Reserved
CV38	RESERVED - code not available	Reserved
CV39	RESERVED - code not available	Reserved
CVR6	RESERVED - code not available	Reserved
CVR7	RESERVED - code not available	Reserved
CVR8	RESERVED - code not available	Reserved
CV65	RESERVED - code not available	Reserved
CV66	RESERVED - code not available	Reserved
CV67	RESERVED - code not available	Reserved
CV68	RESERVED - code not available	Reserved
CV69	RESERVED - code not available	Reserved
