

PA - Roles Required - What roles do I need to create and send the Partnership Agreement?

The **creation** of a new version of the Partnership Agreement requires a user with **Member State Authority (MSA) update** access on the top Member State Level Node for the **Funds that can be covered by the PA** (= ERDF, CF, ESF+, JTF, EMFAF) and that are **applicable for that MS**. ERDF, ESF+ and JTF are always applicable. CF and EMFAF are not applicable for certain MS.

The **validation and sending** of the Partnership Agreement to the Commission requires **two different users** with **Member State Authority (MSA)** access - one user with **update** access and one with **send** access **for all Funds concerned** (ERDF, CF, ESF+, JTF, EMFAF) on the Top Level Member State node.

Every MS Liaison officer managing at least on of these funds (ERDF, CF, ESF+, JTF, EMFAF) is authorised to grant MSA update and/or send access for all funds concerned by the PA.
