

## OP - How to create a Minor Programme Version change?

When the MS wants to create a new version of the programme containing modifications which do not require a new Commission Decision, the option '**Major amendment**' under '**General > Version Information**' should be unticked (this option is ticked by default after creating a new programme version).

The screenshot shows the 'Edit Details' form for a programme version change. The form is titled 'CCI 2014ES16RFOP020' and contains the following fields and options:

- Title\***: Navarra FEDER 2014-20 PO
- First year\***: 2014
- Last year\***: 2022 (dropdown menu)
- Making use of Art. 96(8) CPR**:
- Major amendment (requiring EC approval - cf. Art. 96 CPR)**:  (highlighted with a red box)
- Approved by monitoring committee**:
- Justification for amendment**: A large text area for providing justification.
- MS amending decision number**: A text input field.
- MS amending decision date**: A date picker field.
- MS amending decision entry into force date**: A date picker field.
- Comments**: A large text area for providing comments.

At the bottom of the form, there is a remark: "Remark: If your proposed amendment contains also elements not covered by Commission decision (cf. Article 96 CPR), please make sure the information on the MS amending decision (i.e. MS amending decision number, MS amending decision date and MS amending decision entry into force date) is also filled in." Below the remark are two buttons: "Update" (with a green checkmark icon) and "Cancel" (with a red X icon).

When the Major Amendment option is unticked the MS related fields **Justification for amendment**, **MS amending decision number**, **MS amending decision date** and **MS amending decision entry into force date** need to be filled. This is only possible in versions greater than 1.

CC: 2014ES16RFOP020

Title\* Navarra FEDER 2014-20 PO

First year\* 2014

Last year\* 2022

Making use of Art. 96(B) CPR

Major amendment (requiring EC approval - cf. Art. 96 CPR)

Approved by monitoring committee

Justification for amendment

MS amending decision number

MS amending decision date

MS amending decision entry into force date

Comments

*Remark: If your proposed amendment contains also elements not covered by Commission decision (cf. Article 96 CPR), please make sure the information on the MS amending decision (i.e. MS amending decision number, MS amending decision date and MS amending decision entry into force date) is also filled in.*

This kind of version will be set to **'ADOPTED BY MS'** when sent to the Commission and when only non-decisional parts of the Operational Programme have been modified.

Note that when Major amendment is left ticked, a Justification is required and the version will need a new Commission Decision, even when only non-decisional parts have been modified.
