ACA - Deletion & re-upload of XML files

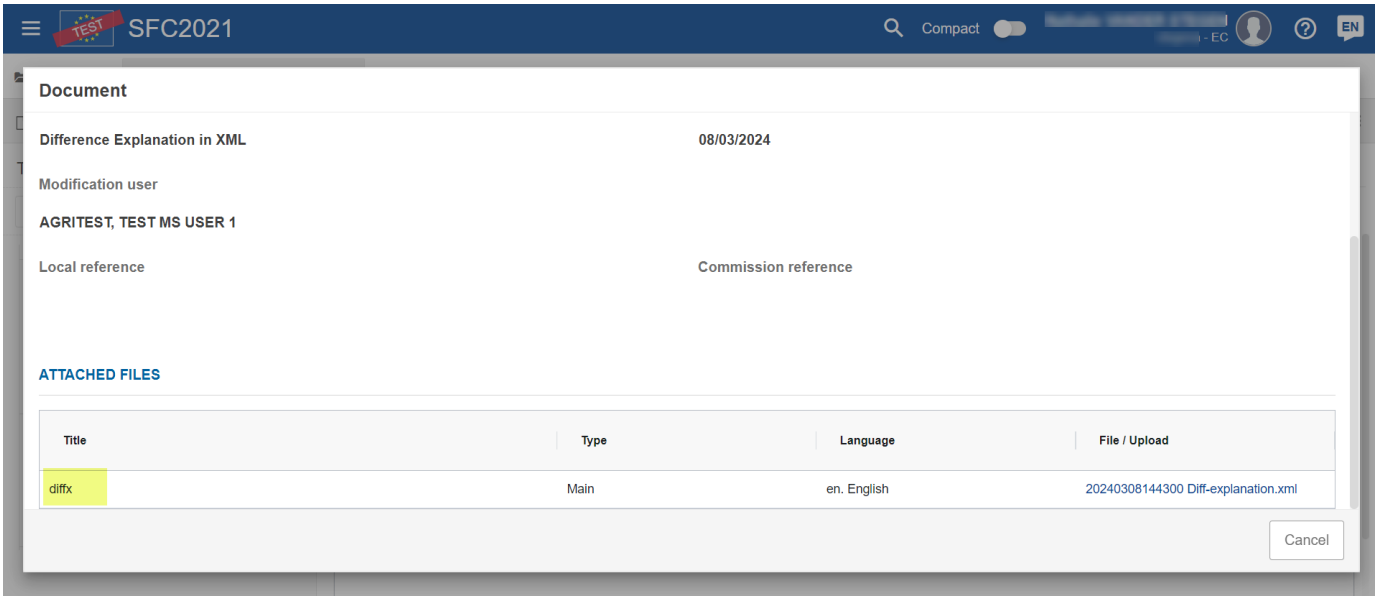

If you have already uploaded the Annual Declaration XML and the Difference Explanation XML files and you delete or re-upload only the Annual Declaration XML file (or only the Difference Explanation XML file), then the data of the related Difference Explanation XML file (Annual Declaration XML file) will also be deleted in the system (even if the XML file is still shown on screen).

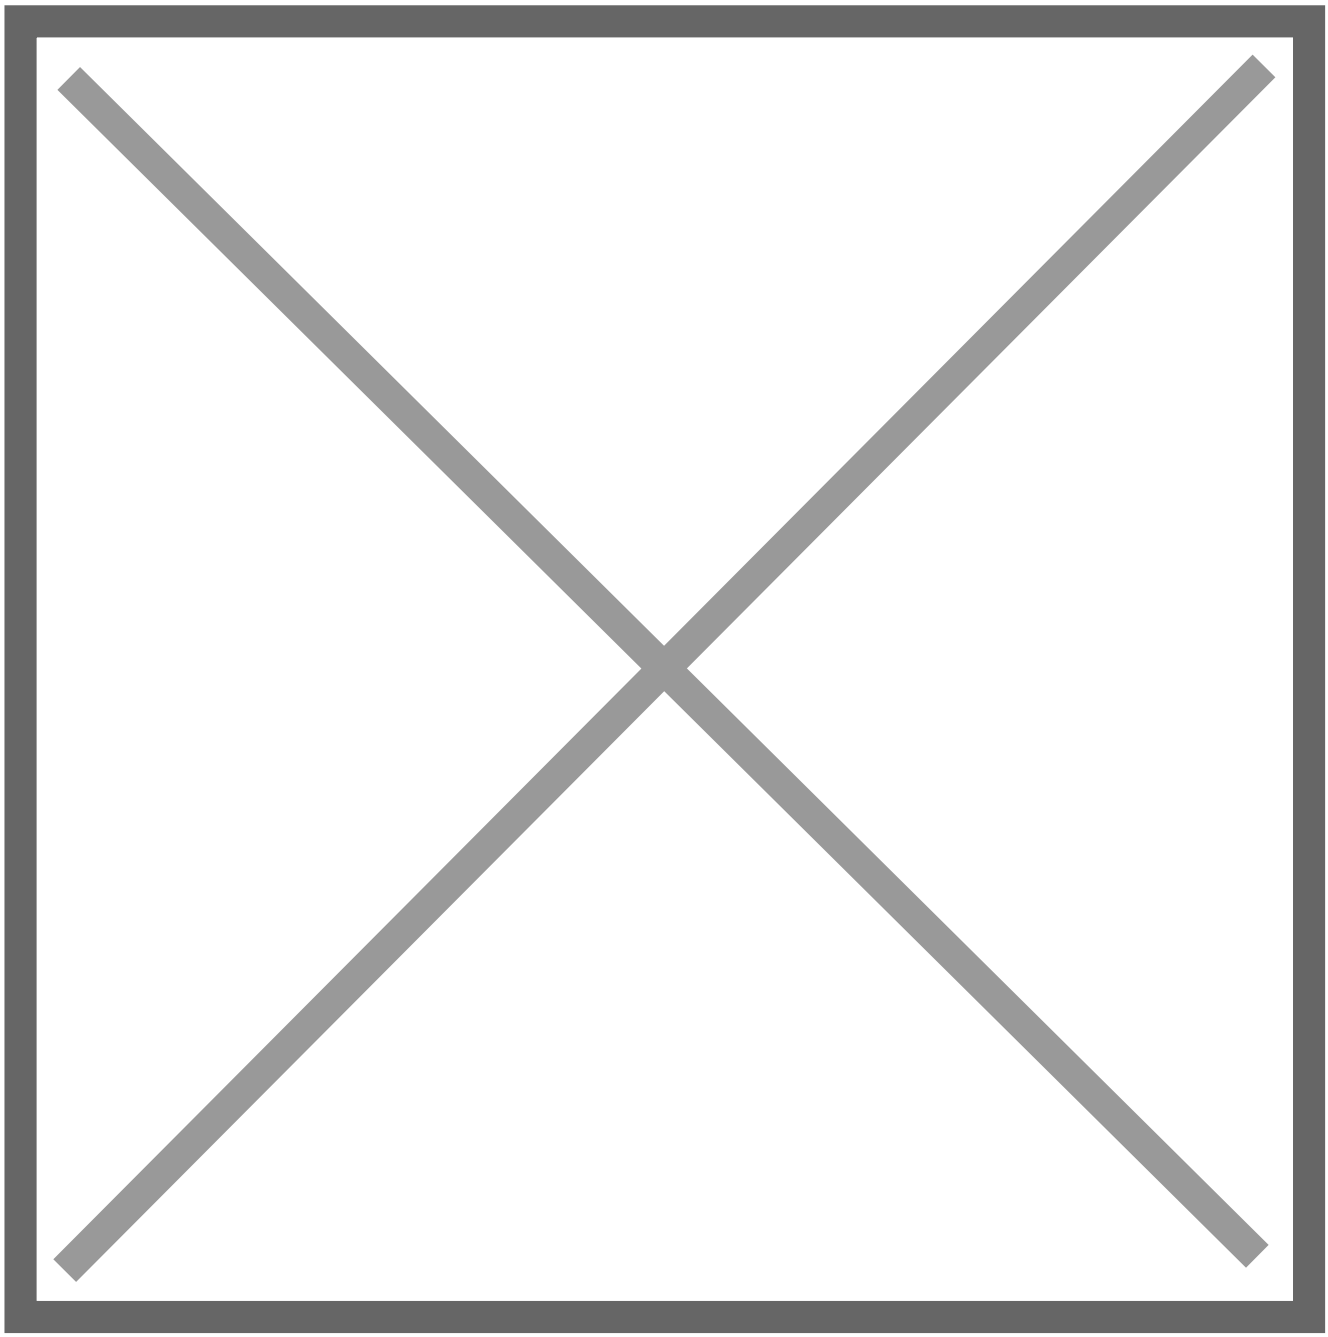

So, you always have to re-upload both XML files!

To know, you can verify in the Annual Declaration section the XML files used to populate the table. They're displayed above the table:
