PRG IJG - Appendix 1 - A Summary - remove Common indicator code

If you entered by mistake a Common indicator for a Priority in the Summary table of Appendix 1 and you try to remove it, the system will return an error message:

As a workaround, please follow these steps:

1) Edit the Summary table, select ‘Yes’ for 'SCO non applicable' for the row you need to correct. This will erase all values for the row, so you might better write the values down for the 'Estimated proportion...' and the 'Code' for the operation to put them back later.

2) Save the change

3) Edit the table again and switch the SCO option back to ‘No’

4) Insert the values previously removed for the 'Estimates proportion...' and the 'Code' for the operation

5) Save the change
