

APR - Section 2.2.3 - Unit of Measurement "operations" is not valid for the budget code "08 03 01 01 00 01 19009 0002" and output indicator "O.19" error into XML upload?

This error appears because there is a difference between UM Defined in CSP and value of UM defined in the XML file.

In such cases, you must open CSP, look for this specific budget code and check the unit of measurement defined in there. APR data will always be checked against CSP data.
