

## APR - Section 2.2.4 - How to declare O.35 output indicator?

Section 2.2.4, Additional National Financing, has a different setup then section 2.2.2. Into section 2.2.4 you need to declare an intervention under that sector, and the budget code for that intervention. See below the error type and the way how you can fix this error.

*In section "2.2.4", for budget code "08 02 02 01 00 00 35000", the intervention code "I.?.1" is not valid for the specified CCI.*

```
<realisedOutputs>
  <additionalNationalFinancing>
    <identifier>
      <budgetCode>08020201000035001</budgetCode>
      <interventionCode>1ABCD</interventionCode>
      <outputIndicatorCode>O.35</outputIndicatorCode>
      <um>op</um>
    </identifier>
    <output>11</output>
    <nationalFinancing>11</nationalFinancing>
  </additionalNationalFinancing>
```
