

[EU Login - What second factor can I configure with my account?](#)

Following the SMS Authentication decommissioning that took place on 30/06/2025 , any addition / modification of mobile numbers to EU Login accounts is no longer possible.

However you may proceed with the usage of alternative authentication methods

Refer [here](#) for more information about which **Two-Factor Authentication methods can be used**.

To ensure **continued access to EU Login** and its associated applications such as SFC2021, SFC2014 and SFC2007, users are encouraged to switch to one of the following secure authentication methods, depending on their preferences and specific requirements:

- **[EU Login mobile app \(recommended\)](#)**. A simple and secure option that offers biometric protection and offline QR code authentication
- **[Security keys](#)**. Removable physical keys like Yubikey USB and NFC
- **[Trusted Platform Module \(TPM\)](#)**. A Computer chip available on many laptops and desktop computers for seamless authentication.

If you still require assistance with EU Login don't hesitate to contact: EU-LOGIN-EXTERNAL-SUPPORT@ec.europa.eu.
