# PAP - How do I create a new version of the Payment Application that is in the "Revision requested by EC" status?

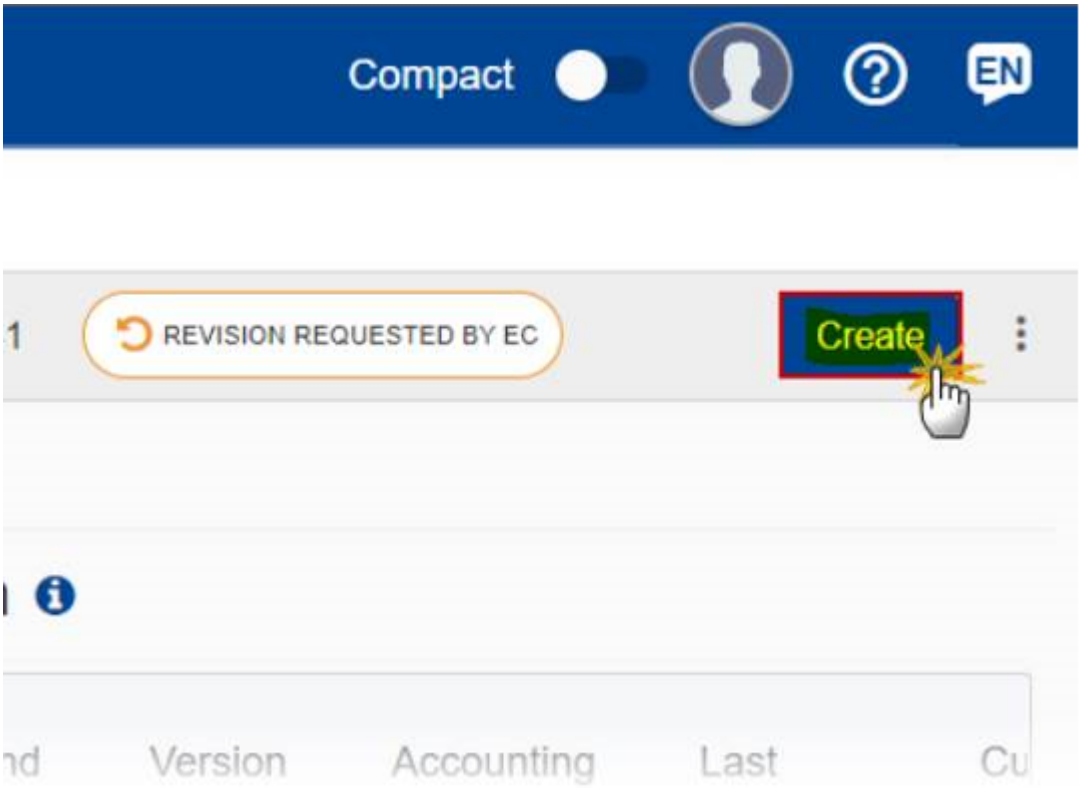

When you have a **returned** payment, last version is in status "**Revision requested by EC**", you have to create a **new version** of this payment instead of trying to create a new Payment Application.

Follow the steps below:

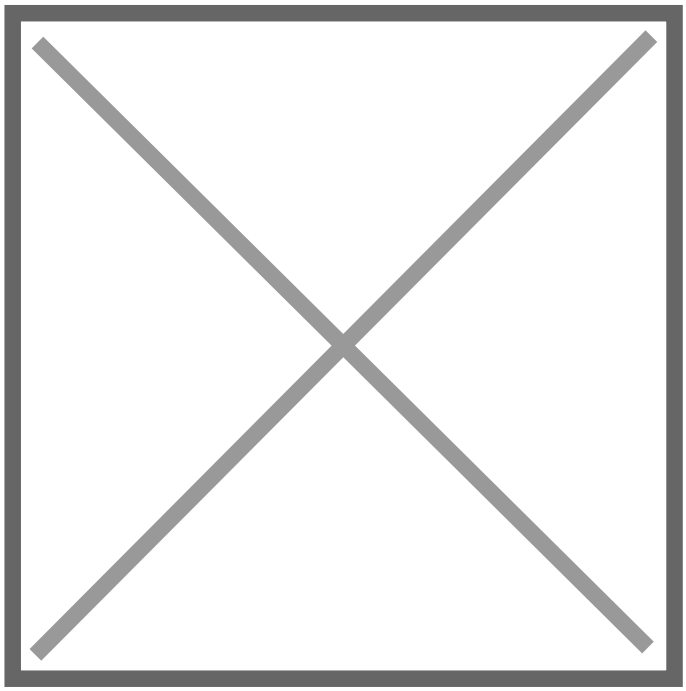

- Access the Payment Application which is in the status "Revision requested by the EC" by double-clicking with the mouse:

- Within this Payment Application, click on the "Create" button:

- Click "Confirm" to confirm the creation:

A new version of the Payment Application for the same period will be created that is linked to the same version of the program as the one returned

previously.
