PRG IJG - How do I delete a priority in an adopted Programme?

You can never delete a priority in an adopted programme, but you can modify the programme as follows:

If you no longer want to use priority X:

-> In T11 add the amounts of priority X to the amounts of priority Y, and set all amounts of priority X to 0,

-> In T2 for Priority X set the milestone and target values to 0,

-> In T3 for Priority X set the baseline and target values to 0,

-> In T4, T5, T6, T8 for Priority X remove the rows.

After that, you should be able to validate without any errors and submit.
