Subject: SFC2007 Release 1.4

Dear members of the SFC2007 Project interest group,

It is with great pleasure that, as communicated in the Release Planning note, we can announce the release yesterday of the updated version of the SFC2007 application. Apart from the introduction of the Ex-ante evaluation document and minor corrections the main content in this release is the Web-Service interface which can be used to interface Member State local systems with SFC2007. This release also takes into account the decisions taken during the COCOF of 25/10/2006 regarding the validation of the NSRF and OP. For more information concerning the use of Web-Services please consult the technical section in Circa.

For your convenience the application also contains a link to the e-learning course which can serve as an on-line help.

The application is accessible for registered users only at the following web-address:

<https://webgate.ec.europa.eu/sfc2007/frontoffice>

In order to obtain access please consult the procedures listed in the SFC2007 Information Letter and in the documents located in Circa at:

http://forum.europa.eu.int/Members/irc/regio/sfc2007/library?l=/control_security&vm=detailed&sb=Title

We stress the fact that all requests for access must pass through the MS Liaison, and remind you of the importance of designating this authority as soon as possible. As mentioned in the document "*Access Control Management*" a transitory procedure has been put in place. Please note that this transitory procedure will now be phased out.

We hope that the SFC2007 web-application meets your expectations and remain at your disposal at sfc2007-info@ec.europa.eu for any questions or comments that you may have.

The SFC2007 team
