### **Subject: SFC2007 Release 1.5**

Dear members of the SFC2007 Project interest group,

It is with great pleasure that, we can announce the release, yesterday 13/12/2006, of the updated version of the SFC2007 web-application which contains all the functionalities of previous versions, certain minor corrections, as well as the notification module which informs those subscribed to certain events of actions taking place on requests, uploads, and programmes. This version also contains new Web Services related to CCI Requests and to events notification.

The application is accessible for registered users only at the following web-address:

<https://webgate.ec.europa.eu/sfc2007/frontoffice>

In order to obtain access please consult the procedures listed in the information letter and in the documents located in Circa at:

[http://forum.europa.eu.int/Members/irc/regio/sfc2007/library?l=/control\\_security&vm=detailed&sb=Title](http://forum.europa.eu.int/Members/irc/regio/sfc2007/library?l=/control_security&vm=detailed&sb=Title)

We stress the fact that all requests for access must pass through your MS Liaison. The list of MS Liaisons, as well as the access requests forms is found in Circa at the above mentioned link.

As well as a new version of the web-application, the web-services have also been updated, and reflect the new functionality which was included in the web-application. This means that a new SDK has also been released (SDK V1.1). Please see the compatibility table below to determine which SDK you should use, given different versions of SFC2007 are available on the various environments (production, testing, training, beta). The version of the SFC2007 application is displayed on the top of each screen of the web-application.

SFC2007 SDK version		SFC2007 version
<b>1.0</b>	works with	<b>any 1.4 version</b>
<b>1.1</b>	works with	<b>from version 1.5</b>

The new SDK is available at the following location:
