- [SFC0700011303] Programming Overview (Only DG EMPL): error message was displayed when user click on button 'data on participants' ..... 1

### CHANGES

- **[SFC0700011386] EAFRD OP: New validation rule 2.61**  
The new rule validates for EAFRD Programmes, that on the priority axis and on the measure, when there is an EAFRD contribution, the Public contribution is  $\geq$  EAFRD contribution (error). This verification is done for versions created from 15/08/2010.
- **[SFC0700011253] Payment Forecasts: Validation rule 2.5 is only applied when the APAF is not yet sent to the Commission**  
Validation rule 2.5 saying that the APAF must be validated before a specific date (warning) should only be applied when not yet sent to the Commission.

### FIXES

- **[SFC0700011000] Annual Control Report: Unable to uncheck the follow up checkbox**  
For an Annual Control Report with the follow up indicator set, it was impossible to uncheck because in the confirmation page it always appears unchecked. Now this has been solved.
- **[SFC0700011303] Programming Overview (Only DG EMPL): error message was displayed when user click on button 'data on participants'**  
When user clicked on "data on participants within the programming overview, the following error message was displayed *The following exception has been encountered when using the url '/sfc2007/test/frontoffice/programmingOverviewOutside/listOutside.gd'* This has been solved. Now the data on participants is displayed.
