### New Functionalities

### Changes

#### Accounts

ACC (19723) - In the Accounts, the TA Rate and the Co-financing Rate in Appendix 1 should not come from the last adopted programme version in the accounting year (= Programme version linked to the Accounts version), but for each of the covered Funds from the Programme version linked to the last submitted Payment (PAP) version for the Fund and accounting year. So, in fact from the TA Rate and the Co-financing Rate stored in the expenditure table of the last submitted PAP version for the Fund and accounting year. The TA amount (doesn't exist for AIB) should be calculated with that TA Rate
