New Functionalities

N/A

Changes

Programme (IJG, ETC, EMFAF, AIB)

PRG(IJG, ETC, EMFAF, AIB) – Informative text has been added to the error message displayed when executing a delete action on an object without documents when the document service is unavailable.

Cap Strategic Plan (EAGF/EAFRD)

AGRI CSP (4834) - New columns added in table 7.1 (CATS code, validity period).

AGRI CSP (5111) - The report generation date has been added to the first page of the report.

AGRI CSP (5309) - error related to WTO section for Austria

AGRI CSP (5243) - Label changed in row38a of the overview table.

AGRI CSP (4672) - Automatic translation in English of the interventions/PUA titles.

AGRI CSP (5172) - 4.1.2.4.6 The sentence in French "Décision(s) concernant l'inclusion des forêts et/ou sous-bois pâturés" must be removed from application SFC2021 and the report. The sentence doesn't appear in the guidelines.

AGRI CSP (5198) - In section 6.2 of the report, the [group] removed following the label TOTAL.

AGRI CSP (5071) – Comparison report – option added to split generation of report into several parts.

AGRI CSP - New validation rules added.

Application EGF

APP EGF (4594) – Version added to EGF Report.

General

GEN SFC (5313) – In the History section the Node Code has been added to the Node name.

Defects Fixed

Partnership Agreement

PA (4898) - section 7 table 8 - On save, the records related with JTF article 7 were saved with a wrong JTF allocation type. This is fixed.

Programme (IJG)

PRG IJG (4114) - ECOAR ESF+ user could not generate programme report if the programme contained JTF. The error message now indicates that the user does not have the permissions to generate the report

Programme (IJG, ETC, EMFAF, AIB)

PRG IJG ETC EMFAF AIB (5205) - Reports - Some headers/values were suffixed with the word "true". This is fixed.

PRG IJG ETC EMFAF AIB (5187) - Source Language field was empty in next version. This is fixed.

Programme (AIB)

PRG AIB (5196) - Proposing empty TF should not be allowed. This is fixed.

PRG AIB (5171) - Reopening Programme didn't trigger notification utility. This is fixed.

PRG AIB (5170) - In Appendix3 (TF) Pre-finance field was empty in edit mode. This is fixed.

TJTP

TJTP (5187) - Source Language field was empty in next version. This is fixed.

General

GEN SFC (5022) - All reports - Don't allow tables to flow out of the page when the language has long words.

GEN DOC (4292) - When the request to download a document attachment then no error was shown to the user. This is fixed.

Standalone Documents

STD DOC (5177) – IT was impossible to create a link to CCI. This is fixed.

STD DOC (5180) - Tabs label name was not correct. This is fixed.
