New Release 06/06/2019 SFC2014 Front Office 2.18.14

Changes:

Implementation report (IGJ,ETC,IPA-CB,EMFF)

- IR IGJ ETC IPACB EMFF (10517,10518) – There was a change in validation rule 2.110. Now the system considers the answer 'no' in element 7.1 as a non value:

    - *2.110 validate in Financial Instruments for FoF and SF, that from elements 7.1, 7.2 and 7.3, one and only one has a value selected. Value 'No' of 7.1 is considered no value{color} (error)*

Implementation report (IGJ)

- IR IGJ (11141) - The validation rules from 155 until 161 were changed to validate in Financial Instruments for SF/FoF and SF, that element 25. has only a value different than ZERO when a value different from 0 exists in element 15.

Financial data (IGJ,ETC)

- FD IGJ ETC - The validation 2.12 and 2.12.2 are now more detailed with the values from Table 1 and 2 that are different and the references to the Priority Axis/[Fund/Category of Region] .

    - *2.12 validate in the IGJ/ETC, IPA-CB Payment Forecast for YYYY01 that the Financial Data in Table 2 per Priority Axis/[Fund/Category of Region] equals the Financial Data in Table 1 per Priority Axis/[Fund/Category of Region]*

Quarterly declaration of expenditure (EAFRD)

- RDP DOE (10767) - The column 'Last Accreditation' was removed from the Paying Agency table.

- RDP DOE (11081) - A validation rule was added to verify the validity of the Paying Agency before the submission.

Defects fixed:

Operational programme (EMFF)

- OP EMFF (11250) - The Validation rule 2.31 should normally check that for measures with an updateable climate change rate, the rate is either 0 or 40. But this wasn't working properly. There were plenty of empty rates. This has now been fixed.

Implementation report (IGJ)

- IR IGJ (11245) - The Validation rule 2.105 was also triggered for non-YEI programmes but it shouldn't. This has now been fixed.

- IR IGJ (11251) - The Validation rule 2.7.12 was triggered when in Table 4A the achievement values were 0, but the rule should only check that they are not null. This has now been fixed.

Implementation report (ETC)

- IR ETC (11243) - The last column of the Table 4 showed values for IPA(e) whereas there was no equivalent in Table 3 because under ETC, the financial indicators in Table 3 performance framework only reflect the values of ERDF. This has now been fixed and now the system only calculates that last column for ERDF and not for IPA(e), nor for ENI when they exist.

Implementation report (IPA-CB,ETC)

- IR IGJ (11193) - In the description of the validation rule 2.106, the fields required to be filled were incorrectly ordered. This has now been fixed.

Implementation report (EMFF)

- IR EMFF (11248) - The validation rules 2.77, 2.78, 2.80 were triggered for financial products of type 'Other' while fields 24, 24.1 and 27 don't exist in that type of product. This has now been fixed.

Annual Implementation Report (EAFRD)

- RDP AIR (11246) - The system couldn't generate a snapshot due to an error on the Additional Indicators table. This has now been fixed.

Financial data (IPA-CB)

- FD IPACBC - The Print of Table 1 showed a wrong calculation basis. This has now been fixed.
