The affected quick guides have been updated on the portal [here](#).

Implementation report (EMFF)

- IR EMFF (11422) - When in compare mode, there were differences in Section 3.2 - table 1. The result indicators have the red asterisk indication in the Table of contents but no differences in detail. This has now been fixed.

Annual Implementation Report (EAFRD)

- RDP AIR (4666) – There was a problem during the report generation as the system missed to copy a figure from a previous version to the new version. This has now been fixed.

Quarterly declaration of expenditure (EAFRD)

- RDP DOE (11442) – The Paying agency name was not correctly displayed in the snapshot report. This has now been fixed.

Documents

- DOC (5374) - In the saved acknowledgment documents, the table of contents was wrongly generated, as it was different font from the one in the Snapshot documents. Also the numbering of the sections was wrong. This has now been fixed.

Microsoft Edge browser

- EDGE (11490) – There was an issue with all objects when saving prints (word or pdf) in the Microsoft Edge browser. The file name was unformatted and the user could only download the documents in .txt format. This has now been fixed.
