New Release 24/02/2016 SFC2014 FrontOffice 2.5.5

New Functionalities:

New Standalone Documents (EAFRD)

- Transnational cooperation project (EAFRD) & European innovation partnership (EAFRD) are now available via the **PROGRAMMING** menu. A quick guide is available on the Portal.

Implementation Report (AMIF/ISF)

- Implementation Report for AMIF/ISF is now complete.

Changes:

Bi-annual indicator data provision (EAFRD)

- RDP/AIR - Table B3 - Add dynamic child Table of Content Items 2014 and 2015 for year 2015.

PRINT AMIF/ISF

- PRINT AMIF/ISF - Allow Print Content for Programme, Accounts and Implementation Report in MS Word also for the Member State users.

Implementation Report (AMIF)

- IR AMIF - Programme Common Indicators having detailed AIR Common Indicators can now be updated.

Defects fixed:

Rural Development Programme

- RDP - prevent the update of the Geographical Area in section 2.1 when new selected value = previous value (Any change of 'Geographical area' in section 2.1 triggered the reset of all the context indicators (Section 4.1.6) to their baseline values).

Financial Data (IGJ/ETC)

- PF - Upload of Categorisation Excel sheet wasn't working for Technical Assistance records.

Accounts (ISF)

- ACCISF - The ISF-B and ISF-P Accounts Declaration table was staying empty when there were only payments for Technical Assistance and when there were no other Projects defined.

Implementation Report (IGJ)

- IR IGJ - Validation rule 2.3 was not triggered when expected.
- IR IGJ - An error occured when trying to create an IR version > 2014 for a CCI having adopted programmes after the year of the IR version.
- IR IGJ - When User Created an IR IGJ confirmation message was from OP instead of IR

Payment Application

- PAP - The early warning system was not sending a notification for those CCI having a PAP in status 'Sent' but to an upper MS node, not to the Commission. It should send a notification also for these CCIs.
