PARTNERSHIP AGREEMENT .....	1
MAJOR PROJECT .....	1
ACCOUNTS (IGJ) .....	1
IMPLEMENTATION REPORT (IGJ) .....	2
IMPLEMENTATION REPORT (AMF) .....	2
PAYMENT APPLICATION .....	2

## New Functionalities:

### *N/A*

- N/A.

## Changes:

### *SFC Portal*

- Independent of the language selected in SFC2014 the link to the portal quick guides should default to English quick guide version.
- Standalone DOCs: Foresee contextual help icon which directs to the Portal and per document type a link to the corresponding template.

## Defects fixed:

### *Partnership Agreement*

- PA: Section 2.3.5 Priority Axis in Partnership Agreement should display the list of CCIs as they were introduced (one per line).

### *Major Project*

- MP - Error when sending a major project submission.

### *Accounts (IGJ)*

- ACR - only allow sending of non integral documents when the object has already been sent.

### ***Implementation Report (IGJ)***

- IR – Deletion of an IR in status 'Returned for modification by MS' did not delete the IR and no action could be done on it anymore
- IR IGJ - A user with only MS Managing authority Send permissions should be able to validate the IR but he cannot

### ***Implementation Report (AMF)***

- IR AMF - missing field SUMMARY between SO and NO in report
- IR AMF - Specific indicator code and description not printed in report Section 5

### ***Payment Application***

- PAP - The early warning system was not sending a notification for those CCI having a PAP in status 'Sent' but to an upper MS node, not to the Commission. It should send a notification also for these CCIs.
