## New Functionalities:

N/A

## Changes:

### *General*

- The status date now gets updated in alignment with the object history (for example when edited by a different person)

### *Rural Development Programme (EAFRD)*

- RDP - A new baseline context indicator "rural" was added in "4.1.6 > 1 socio eco > 1 population"
- RDP - The budget code(s) is now displayed for all lines of the Financial Plan

### ***Implementation Report (IGJ)***

- IR IGJ - Table 4A under Technical Assistance had all unnecessary common output indicators removed

### ***Implementation Report (IGJ/ETC/EMFF)***

- IR - Implementation of the compare mode for financial instruments

### ***Implementation Report (IGJ/ETC/EMFF/FEAD)***

- IR - Validation rule 2.3 prevented the validation of Annual Implementation Reports when a new Operational Programme version gets adopted after the initial creation of the Annual Implementation Report and refers to a Commission Decision with a date in the Reporting Year. Therefore, validation rule 2.3 was modified to take the creation date of the initial Annual Implementation Report version YYYY.0 into account

### ***Implementation Report (EMFF)***

- IR EMFF - Caption and combo box was organized to fit in the edit screen

### ***Financial Allocations (IGJ)***

- IR IGJ - Financial allocations for IGJ were updated after midterm review

### ***Payment Application***

- PAP - Payment applications with negative requested amounts are now not allowed for both interim and final payment applications

### ***Quarterly declaration of expenditure (EAFRD)***

- DOE - When creating a new declaration of expenditure the system now retrieves Bank Account info + Paying agency from the previous accepted declaration. In case of a new minor version, such info will still be copied from the previous minor version

### ***Accounts (AMIF,ISF)***

- ACC AMIFISF - The data related to Financial On The Spot Controls and Operational On The Spot Controls were modified including technical assistance
- ACC AMIFISF - New table added and modifications made on the layout and calculation changes for the existing table for Section III.C Summary of on-the-spot controls

### **Defects fixed:**

### ***Cooperation programme (ETC)***

- CP ETC PRINT - On print mode, the totals for EIB and Third Countries show variable name instead of amount in table 16

## ***Rural Development Programme (EAFRD)***

- RDP - Table of Contents for amendments is now correctly ordered
- RDP - Now it is possible to add two amendments with the same name without getting an error message

## ***Major Project Notification***

- MPN - There was a difference between Web and Print in Part A.F. When there was no value in the web for Yes/No, the Print was showing 'Yes'. This has been fixed
- MPN - The fields for section E and F with data type with only two possible values were switched. This was corrected and now they are in the right database field

## ***Application (EGF)***

- APP EGF - The EGF title contained the economic sector and region combinations multiple times. Now when generating the EGF title it only includes distinct values of the economic sector - region combinations. Also in the Print only distinct combinations is now shown in the front-page

## ***General***

- Multiple fields that were missing the mandatory mark (\*) now have them

## ***Implementation Report (IGJ)***

- IR IGJ - When creating a new Implementation Report version, the financial instrument Specific fund of "Fund of funds" was shown, in compare mode, out of section 8 - financial instruments in the table of content. This has now been fixed
- IR IGJ - it was not possible to enter data in Table 10 because there were no buttons to click that must normally appear on top of table. Now edit buttons are available.

## ***Implementation Report (FEAD)***

- IR FEAD - When creating the Annual Implementation Report, the list of CCIs and Years were empty although preconditions were met. This has been fixed

## ***Implementation Report (IGJ/ETC/FEAD)***

- IR - An error occurred when trying to create an Implementation Report for ETC/IGJ/FEAD. This has been fixed

## ***Implementation Report (FEAD/EGF)***

- IR - On Return for modification by EC, the user could add a document "Official Commission's Observations", although it was not required

## ***Implementation Report (EMFF/EGF)***

- IR - When a user with read only access tried to view the Implementation Report the system was displaying an "insufficient privileges" error. This has been fixed.

### ***Implementation Report (EMFF)***

- IR EMFF - When the user compared for first time just after creating a new version, almost all table of content items were marked for changes where it has not been changed. This has been corrected
- IR EMFF – Using compare multiple table of content items no longer displays red tags where there was no changes done
- IR EMFF - There is no longer an extra zero shown while using compare mode after the creation of new version and filling data in Table 5
- IR EMFF - The snapshot is no longer interfering in the sending of the Implementation Report

### ***Annual Implementation Report (EAFRD)***

- AIR EAFRD - Upload documents of previous version button is working now.

### ***Payment Application***

- PAP - Creation of Final Payment is only possible after end of declaration period. It is not possible to cancel a Final Payment

### ***Payment Application (FEAD)***

- PAP FEAD - Creation of a second payment application was not possible if first one was already 'Sent to EC'. It is now possible to create multiple Interim Payment Applications.

### ***Payment Application (EMFF)***

- PAP EMFF – An error occurred when trying to create payment application for EMFF. This has been fixed

### ***Quick Search***

- Quick Search - An error was occurring when clicking on the results of the quick search for the following types of CCI: EMFF, IPA-CBC, EGF. This has been corrected and now it does find results for Partnership Agreements CCIs

### ***Event Registration***

- NOT - List of event types is now ordered in the Event Types screen
- NOT - The user was unable to subscribe for IRACC event when they selected all event Type Groups and all event Types. This is now possible.
