New Release 23/05/2016 SFC2014 FrontOffice 2.9.1.2

New Functionalities:

N/A

Changes:

Rural development programme (EAFRD)

- RDP AIR (336401) - A new Validation Rule was created to prevent the Member State to submit their Annual Implementation Report to the European Commission before the 1st June 2016. The message text is: "The submission of the Annual Implementation Report to the European Commission in SFC2014 will be opened starting from the 1st June 2016'

Implementation Report (IGJ)

- IR IGJ (403645) - Editing of ESF/YEI performance indicators is now enabled in the Performance Framework Table 5 which does not exist in the Operational Programmes Tables (4A, 4B and 5) and therefore does not exist either in the Annual Implementation Report (tables 2C and 4B). Since the values for the ESF/YEI output and result indicators from AIR tables 2C and 4B were automatically generated, these standalone Performance Framework indicators were not getting any values. Now User is allowed to update them.

- IR IGJ (393732) - A few changes are now in place:

  - New validation rules,

  - Changes in Table 2C,

  - Achievement ratio as nominal value is always shown

  - Table 5 Performance Framework Indicators.

  An updated version of the quick guide is available here

Implementation Report (IGJ/ETC)

- IR IGJETC (390419) - Rich text on the contribution to macro-regional and sea basin strategies was replaced with structured data for IGJ section 14.4 and ETC section 11.3 (Both for web and print).

Defects fixed:

Implementation Report (ETC, IGJ)

- IR ETC IGJ (402597) – Target value and qualitative target in Table 1 were wrongly copied from previous Implementation Reports instead of taking them from the programme version. This has now been fixed.

Implementation Report (IGJ)

- IR IGJ (403986) - Wrong message was displayed for the validation rule 2.9.15 which checks that both values are equal. The message is now corrected.
- IR IGJ (403089) - Column Observations was missing in Table 5 in the Print. This has now been fixed.
