New Release 17/06/2020 SFC2014 Front Office 3.3.3

Changes:

Operational Programme (EMFF)

- OP EMFF (12432) – Due to the inclusion of the COVID-19 measure, there is now a new Union Priority Measure 1.1b under Union Priority 1 in Table 8.2.

- OP EMFF (12433) – The validation rule 2.24 has been modified by adding the maximum co-financing allowed for the new Union Priority Measure 1.1b:

  - *2.24 validate the EMFF co-financing rate in the Financing Plan by Union Priority and Union Priority Measure used in the Programme (8.2)(error). In order to determine it is used check if a Specific Objective Measure is used in section 3.3 and then relate to Union Priority Measure Emff and Union Priority Emff. Union Priority 3 Measures 2 and 3 are a special case since they relate to the same Specific Objective Measure in section 3.3 and they are not obliged to use them both in 8.2. So, for them the validation result is only a warning:*

    - *Union Priority 1, Measure 1: equals 50% (error)*

    - ***Union Priority 1, Measure 1b: between 20% and 75% (error)***

    - *Union Priority 1, Measure 2: between 20% and 75% (error)*

    - *Union Priority 2: between 20% and 75% (error)*

    - *Union Priority 3, Measure 1: between 79.999% and 80% (error)*

    - *Union Priority 3, Measure 2: between 89.999% and 90% (warning)*

    - *Union Priority 3, Measure 3: between 69.999% and 70% (warning)*

    - *Union Priority 4: between 20% and 85% (error)*

    - *Union Priority 5, Measure 1: **If > 0 then** equals 100% (error)*

    - *Union Priority 5, Measure 2: equals 100% (error)*

    - *Union Priority 5, Measure 3: between 20% and 75% (error)*

    - *Union Priority 6: **If > 0 then** between 20% and 75% (error)*

    - *Technical Assistance: between 20% and 75% (error)*

Implementation Report (IR IGJ/ETC/IPACBC/EMFF)

- IR IGJ ETC IPACBC EMFF (12497, 12498) – The workflow for the implementation report has been changed with two new Actions and two new Statuses:

  - Actions:

- - *Allow request for technical return (Last AIR version is in status "Accepted by EC")*
  - *Return for modification on Indicators (Last AIR version in status "Accepted by EC (Request technical return allowed)" and a document "MS request for technical return" received)*
- Statuses:
  - *Accepted by EC (Request technical return allowed)*
  - *Accepted by EC (Technical return)*
- Also the document type "MS to reply to the Acceptance letter" was split in three different labels:
  - *"MS reply to Article 50(8) observations in EC accepted letter"*
  - "MS reply to observations in EC accepted letter (other than Article 50(8))"
  - "MS request for technical return" – this is only for exceptional ex-post changes in indicators in already accepted AIRs -> but this label should not be only if the desk will ask for it (after an agreement of COM-MS).

2021-2027

- 2021-2027 (12509) - In the CCI search field, there is now the possibility to search a document with a CCI number for 2021.

Defects fixed:

Rural Development Programme (EAFRD)

- RDP EAFRD (12529) – There was an issue with maximum values for the validation rules 250 and 255. This has now been fixed.

Cooperation Programme (IPA-CB)

- CP IPACB (12512, 12526) – In the Print report, the Asterisked text related to COVID-19 measure changes in Table17 was missing. This text and corresponding translations are now added in the Print.

Annual Implementation Report (EAFRD)

- AIR EAFRD (12306) – Previously, when the user generated the monitoring annex PDF (via the button 'Print'), in the column 'realised performance' of table F1, there was a {0} instead of displaying the year. This has now been fixed.

Control Data and Control Statistics (EAFRD, EAGF)

- CDS EAFRD, EAGF (12532) – The text in cover page of the acknowledge document referred to the Accounts report. Now it has been corrected to Control Data and control statistics.
