This version number is selected by the User at creation of the Transmission of Data. The work version number is automatically provided by the system and is 0. 3. Select the following information:

(1) Select a *CCI* Number.

The CCI list contains all submitted EMFAF Programmes managed at the User's Node, and which contain Funds for which the User is registered (withdrawn versions excluded). The list returns the CCI, and the Programme English Title retrieved from the last submitted version of the Programme.

(2) Select a *Version*.

The Version list contains all Transmission of Data versions which do not yet exist for the CCI, with a submission cut-off-date smaller than the current date and a first adoption date of the Programme smaller than the current date. The list is in ascending order. Although the submission deadlines are defined in the regulation they don't need to be respected. This means that a Transmission of Data can only be created after the cut-off-date of a Submission Period, but also after the deadline of the Submission Period.

(3) Click on **CREATE**.

The status of the Transmission of Data is **OPEN**.

For EMFAF, the following tables foreseen in the official template (Annex VII) will be available in the different submission periods:

Submission by	T1	T2	T3	T4	T5	T6	T7	T8	T9	T10	T11	T12
31/01	x			x	x				x			x
30/04	x			x								
31/07	x			x	x				x			x
30/09	x			x								
30/11	x			x								

The following tables foreseen in the official template (Annex VII) will be available for the EMFAF module:

Module	T1	T2	T3	T4	T5	T6	T7	T8	T9	T10	T11	T12
EMFAF	x			x	x				x			x

#### REMARK

On Create, the initial Transmission of Data structure is created and a Table of Content (ToC)/Navigation Tree is presented, so the User can continue to populate the structured data of the Transmission of Data.

The Transmission of Data version is linked to the last adopted version of the Programme in force at the cut-off-date.

The Status date of the **ADOPTED BY MS** version will only be used in case there is no 'MS amending decision entry into force date' and when it is not a 'Clerical or editorial amendment'.

The records of Tables 1, 5, 9 are automatically created and populated with the data of the linked Programme version.

The achievement values (non-programme data) are then updated with achievement data from the previous submitted Transmission of Data version containing the table. See the different Table requirements for the Table specific logic.

The Tables 4 and 12 will be directly copied from the previous submitted Transmission of Data version containing the table.

The Officials in Charge are copied from the previous Transmission of Data version of the same Programme, when existing.

## Record/Edit the Transmission of Data

Before importing the Excel, each of its records is checked by the system and validated in 2 phases:

Phase 1 - the system validates cells consecutively : each cell, if not empty, is validated against valid values (in reference data) and it will display an error in case it was not possible to find the reference data id for the value.

Phase 2 - the system validates the record as a whole: these are validations like checking if the combination of priority/specific objective/fund/category of region exists in the programme, the valid value of region category given a fund, etc.

<b>NOTE</b>	<p>The records are automatically foreseen from Table 3 of the linked Programme version. Additionally, when Common Result sub-Indicators (“of which”) have been defined for reporting, they will automatically be foreseen for the Indicators coming from Table 3. These Common Result sub-Indicators (“of which”) will not have a Baseline, nor a Target from the Programme.</p> <p>Only columns 11, 12, 13, 14 and 15 are editable. Column 15 is always editable and optional. Check this <a href="#">FAQ</a> to see in which cases columns 11, 12, 13 and 14 are editable.</p>
